

TITUS Mobile™

Mobile devices are becoming more and more prevalent in enterprises today. Many organizations rely on mobile devices for sharing information among employees, customers and partners. Email continues to be the primary method for sharing information from these devices, which presents a challenge for organizations that must protect information assets while promoting information sharing. Organizations need to focus on securing these platforms by separating business email from personal information and controlling information flowing to and from mobile devices.

TITUS Mobile is a security & governance solution that ensures mobile email is not at risk. TITUS Mobile is a lightweight, easy to use email solution which provides a proven environment for securely sending email and viewing attachments on mobile devices. TITUS Mobile complements and is an integral part of any mobile strategy, and facilitates the introduction and disposal of devices.

Highlights

TITUS Mobile is a lightweight secure container that prevents users from putting critical business information at risk. The solution helps organizations:

- Secure email and attachments
- Separate business from personal information
- Ensure secure email is an integral part of their mobile and MDM strategy

The solution is designed for Microsoft Exchange® Server 2010 and Apple iPhone, and supports iPad.

TITUS Portfolio of Email Security Solutions

TITUS Message Classification™ for Microsoft Outlook

TITUS Message Classification™ for Outlook Web App

TITUS Message Classification™ for Lotus Notes

TITUS Mobile Features and Benefits

Key Features	Benefits
Secure Container	Separates business from personal information, and allows users to securely view emails and attachments without the risk of storing information on the device.
Familiar Interface	Retains the familiar look and feel that mobile users have come to expect with iOS-like email, calendar, and contacts from Exchange 2010
Policy Enforcement	Inspects the email for policy violations before the message leaves the device, and provides instant feedback so that the sender can correct any problems.
Email Filtering	Allows organizations to prevent users from viewing emails with attachments on their mobile devices.
Proven Foundation & Deployment	Deploys easily and quickly on existing Microsoft Exchange infrastructure and is based on the proven Microsoft Exchange foundation. Easily added to a user's iPhone or iPad without requiring download from an app store.
Safe Introduction and Disposal	Facilitates the introduction and disposal of devices by keeping emails and attachments safely off the device. This ensures data is not put at risk in the event that the device is lost, stolen, or disposed.
MDM Friendly	Works in-concert with any MDM solution, which can simplify scalable deployments. Either an MDM or Microsoft Exchange can enforce usage of TITUS Mobile.

About TITUS

TITUS is a leading provider of security and data governance software that helps organizations share information securely while meeting policy and compliance requirements. With over 2 million users worldwide, our solutions enable enterprises, military and government organizations to classify information and meet regulatory compliance by securing unstructured information. Products include TITUS Classification, the leading message, document and file classification and labeling solutions that enhance data loss prevention by involving end users in identifying sensitive information; TITUS Mobile, a mobile email solution for securely sending email and viewing attachments on mobile devices; and the TITUS family of classification and security solutions for Microsoft SharePoint. TITUS solutions are deployed within over 500 organizations around the world, including Dow Corning, United States Air Force, NATO, Pratt and Whitney, Canadian Department of National Defence, Australian Department of Defence, and the U.S. Department of Veterans Affairs.
